
PREFACE

Dear Readers,

In this issue of our Koşuyolu Heart Journal, you will find some studies on congenital heart diseases and surgery. Our Pediatric Cardiovascular Clinic, which was established 10 years ago in Koşuyolu Heart Hospital, has become one of the few congenital heart centers in Turkey. In addition to a center where surgeries are performed for complex neonatal and pediatric cardiac cases, our clinic also provides a high specialist in this field. We wanted to share some studies from our clinic and other centers that have valuable studies on this subject.

Best Regards

Prof. Dr. Hakan Ceyran

Co-Editor, Koşuyolu Heart Journal

Professor of Pediatric Cardiovascular Surgery

Health Sciences University, School of Medicine
